Product Overview

Introduction

The M-Series Stacked Awning W6400 (all-wood) presents a unique alternative to mulling frames vertically, while maintaining Reveal Windows & Doors commitment to superior quality with optimal performance. The durable stainless steel friction hinges allow multiple awning windows to be “stacked” on top of each other within a single frame, so that each sash in the M-Series Stacked Awning W6400 can be operated independently from the bottom with a smooth push-out motion. Our M-Series Stacked Awning W6400 is available with different glazing options and custom hardware for unique looks and maximum acoustical and insulating performance.

Wood Species

Our standard wood species are the following:

- Pine
- Vertical Grain Douglas Fir
- African Mahogany

Alternative and exotic wood species are also available. See the Wood Species page in the General Info section.

Other Options

The M-Series Stacked Awning W6400 can be purchased with additional options such as concealed roll screens, custom hardware, egress hinges and/or divided lites.

Contact Reveal Windows & Doors for additional options and customization.

Glazing Options

Standard glazing for the M-Series Stacked Awning W6400 is 1” overall insulated glass.

Custom glazing and tinted glass are available.
