# Product Overview

## Introduction

The Direct Set WA4400 window (wood with exterior aluminum cladding) is the foundation of our window line – at once elegant and distinctive, with narrow sight-lines and a multitude of options to allow you to design your own perfect “picture window”. Direct set windows consist of a jamb only, and their glass is glazed directly into the frame to maximize the light and view. The exterior aluminum cladding is finished with a custom color-matched Kynar™ paint, for long-lasting beauty and minimal exterior maintenance.

Configure your direct set window with numerous glazing options, grid patterns, and a variety of shapes and sizes. Every window we sell is crafted with the signature Reveal Windows & Doors quality that adds value and long-lasting beauty to any environment.

## Wood Species

Our standard wood species are the following:

- Pine
- Vertical Grain Douglas Fir
- African Mahogany

Ask for FSC®-certified products. Alternative and exotic wood species are also available.

## Glazing Options

Standard glazing for the Direct Set WA4400 window is 1-1/8” overall insulated glass (IG) with a Low-E<sup>2</sup> coating for UV resistance and improved thermal performance.

Custom glazing and tinted glass are available, as well as different glazing thicknesses and configurations.

## Other Options

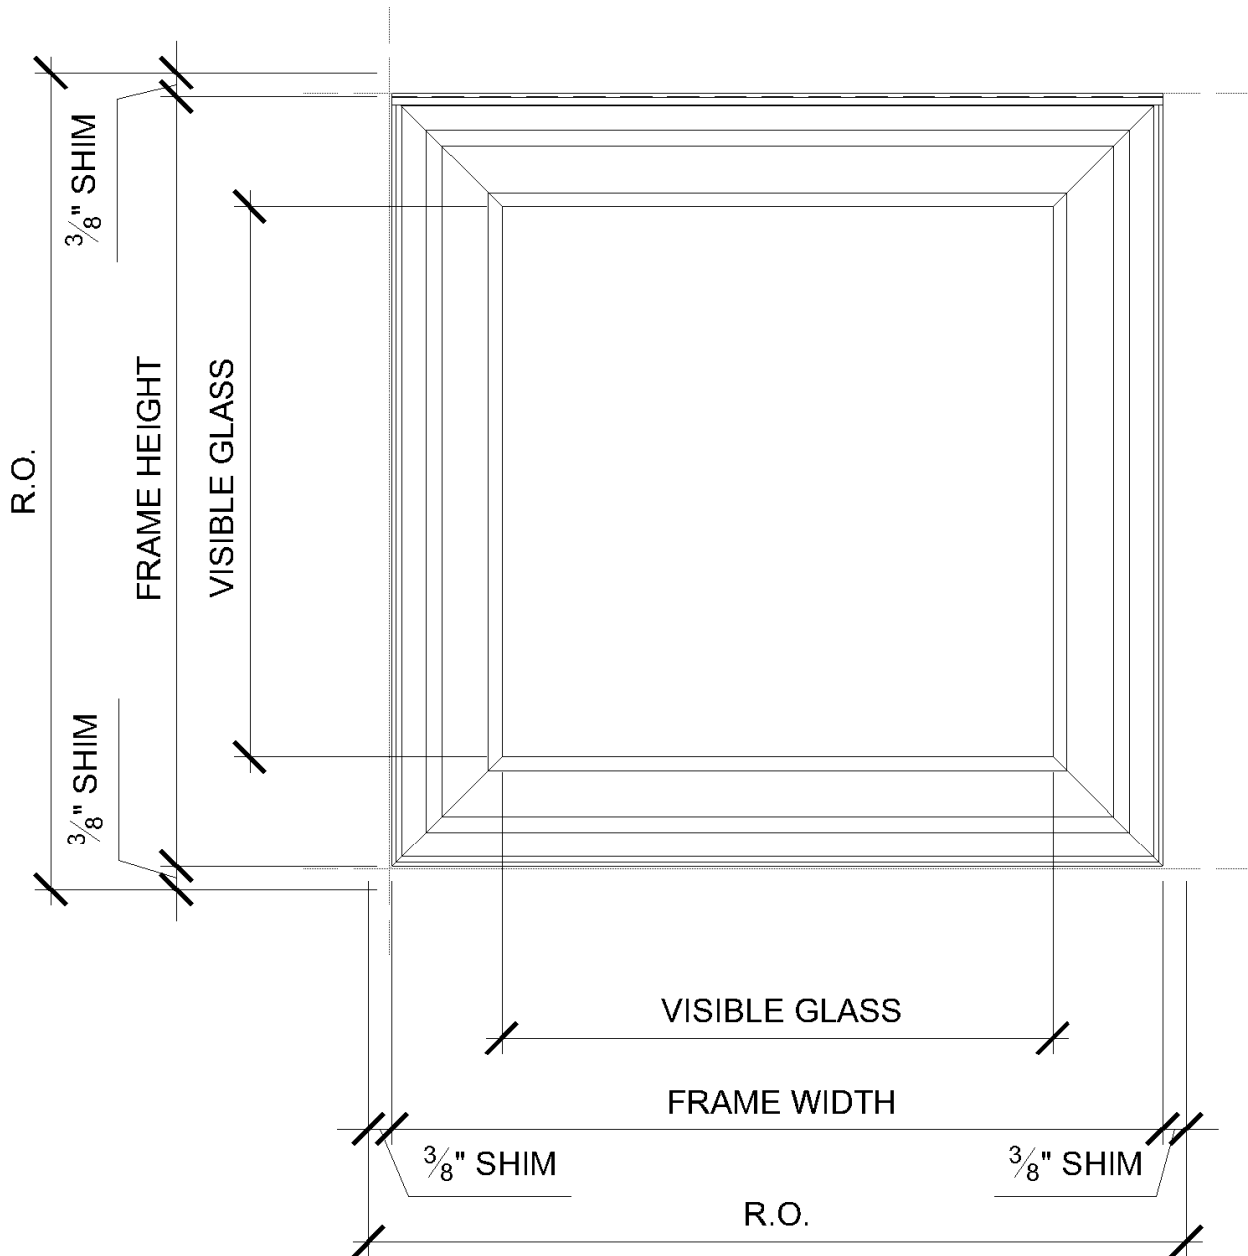

The Direct Set WA4400 window can be purchased with additional options such as simulated divided lites or corner configurations. It can also be mulled to a variety of other Reveal products for consistency of sightlines and design.

Contact Reveal Windows & Doors for additional options and customization.
